About Me

I'm a final year student pursuing a bachelors degree in Computer Science and Engineering with a keen interest in developing reliable software.

Primarily working towards front end development and turning UI into functional code.

Experience

Farmer   Years: 2017 - Present
- Manage and operate a family-owned farm, specializing in organic produce and sustainable farming practices.
- Plan and execute planting, cultivation, and harvesting activities.
- Implement irrigation systems and monitor soil health to ensure optimal crop growth.

Education

2020-2024

Indira Gandhi University, Haryana, India

Bachelor of Technology in Computer Science and Engineering

Projects

1. Sudoku Helper: I collaborated with a friend on this project and primarily focused on designing the frontend, user interface, and implementing interactivity. The Sudoku Helper is an application that assists users in solving Sudoku puzzles by providing hints and strategies.
2. Portfolio Website: I created my portfolio website using HTML, CSS, and vanilla JavaScript. It serves as a showcase of my skills and projects. I designed the frontend of the website, ensuring it is visually appealing and user-friendly. The website is responsive, features smooth animations, and provides an overview of my work and abilities.
